

Cake Website Improvement Guide

Ideas to make your HTML/CSS cake website more attractive:

1. Add a hero banner with a large cake image and a catchy heading.
2. Use a soft color palette (pink, cream, brown, pastel shades).
3. Add a navigation bar: Home, Cakes, About, Contact.
4. Display cakes in cards with images, prices, and short descriptions.
5. Add hover effects on buttons and product cards.
6. Include customer reviews/testimonials.
7. Add a contact form and social media icons.
8. Use consistent fonts and spacing throughout the website.
9. Make the layout responsive for mobile devices.
10. Add a footer with contact details and copyright text.

Project Description for Resume

Developed a responsive Cake Shop Website using HTML and CSS, featuring product displays, navigation menus, and a user-friendly interface.
